2022 Teacher Leader Academies

June 13 - 15, 2022 | Transportation Cabinet | Frankfort

ELA Academy

**Making Time for What Matters Most:
A Pursuit to Engage and Empower Adolescents**

This three day learning academy provides ELA teachers with the opportunity to explore classroom practices that prepare students for success in postsecondary settings. The academy is designed as an immersive workshop where teachers will explore their beliefs about teaching and learning, and align those beliefs with daily practices that support a balanced approach to literacy instruction. Through experiencing a variety of literacy practices (reading, writing, speaking and listening) and lessons, coupled with SEL practices, teachers will gain new ideas that will engage and empower adolescents. In this workshop approach to professional learning, teachers will interact with one another through reading, writing and discussion to plan for authentic literacy experiences that maximize student engagement and learning in and beyond the classroom.
