

You're Invited...

2022 Teacher Leader Academies

June 13 - 15, 2022 | Transportation Cabinet | Frankfort

Leadership Academy Leading for Success!

Leaders will have the opportunity to explore college-readiness from the perspective of how schools can increase academic preparedness intentionally as a team, better understand and plan for how to address the challenges of high-poverty and first-generation college students, and connect learnings to the schools plan for the coming year.

Administrators will work on a parallel pathway as content area teachers, work to strengthen their approaches to providing students experiences that prepare them to be successful in the postsecondary setting. Leaders will have multiple opportunities to interact with teachers to identify changes/shifts in instruction, how leaders can support teachers in being successful with those shifts, and what leaders can expect to see from teachers and students as they implement and refine these approaches.
